

Deactivator Box

Century Integrated Fast Deactivator Box (DB230/RF, DB130/AM) is specifically designed for smart new retail environments, reduces issues associated with customer-operated self-service. Available in both AM and RF versions, the device enables centralized, high-speed deactivation: no matter how many items are placed in the box, all tags are fully deactivated after just three seconds. Eliminates the traditional, repetitive deactivation steps, significantly shortens wait times, and improves overall checkout efficiency, ultimately enhancing the shopping experience. Ideal for scan-and-go, self-checkout, unmanned stores, and other smart retail scenarios.

Features

- ▶ Anti-collision edge design, wear-resistant and scratch resistant, guarantee the safety of goods and customers
- ▶ 43L ultra large capacity, no blind spot inside the box, plug and play
- ▶ Support multiple deactivation modes, support linkage with the cash system
- ▶ Universal wheel with locking function, easy to move and place in any position

Specifications

Product Code	Central Frequency	Outside Dimension (mm)	Internal Dimension (mm)	Power Supply	Power Consumption
DB230	8.2MHz	525 (L)*435 (W)*500 (H)	435 (L)*350 (W)*320 (H)	12VDC	<20W
DB130	58KHz	525 (L)*435 (W)*500 (H)	435 (L)*350 (W)*320 (H)	110V/220VAC	<100W
